

Your AI financial advisor is in your *texts.*

Proactive advice. Instant execution. USDC onramp — all in iMessage.

7:04 AM · EVERY MORNING

Basemate already texted you *first.*

Your USDC is earning 5.1% APY. ETH is up 18% this week — want to take some profit? You have \$400 idle. Want me to put it to work? **The briefing lands before you even open your bank app.**

iMessage is the world's largest *unbanked* network.

1.3 billion users. No way to earn, send, or grow money — without leaving the app. That gap is the opportunity.

Meet *SETS*.

Send · Earn · Trade · Save. Four things your money should do. One AI advisor in iMessage that handles all of them — and texts you when it's time to act.

S

Send

Pay friends, split costs, move USDC anywhere — in a text.

E

Earn

Your idle USDC earns 5%+ APY. Basemate finds the best rate and deposits it.

T

Trade

When the AI spots the moment, it tells you. One reply to execute.

S

Save

USDC as your base. Stable, healthy, and growing — not chasing pumps.

Your iPhone is your *bank branch.*

Native iOS USDC onramp — inside iMessage. Pay with Apple Pay, card, or bank transfer. USDC lands in your agent wallet in seconds. No Coinbase. No MetaMask. No app switch.

01 Tap to fund

Apple Pay, debit, or bank — one tap, any amount.

02 USDC in seconds

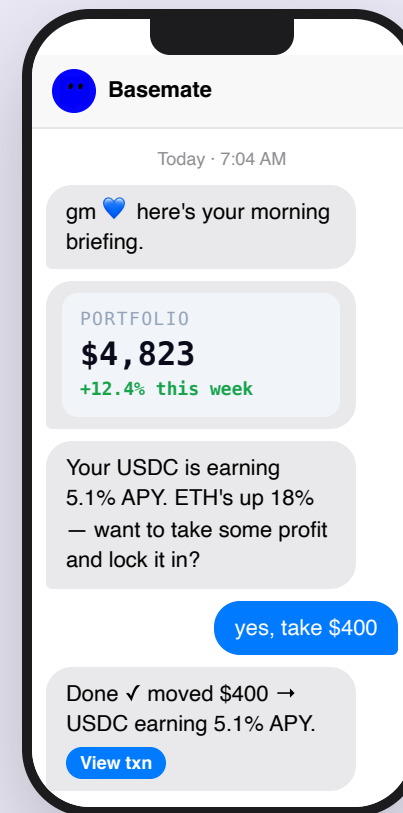

Instantly available in your iMessage agent wallet on Base.

03 Zero friction for normies

No seed phrase. No CEX account. If you have an iPhone, you're in.

The briefing lands at 7 AM.

Every morning Basemate sends a briefing: your yield rate, portfolio moves, and one or two things worth acting on. Reply to act. Ignore if you're busy. It'll check in again tomorrow.

Real users. Real *money*.

Launched May 27, 2026. Live on Base App and iMessage beta.

Three things just *aligned*.

01 Stablecoin clarity

The GENIUS Act passes in 2026. USDC payments become legally simple. The timing is now.

02 Base is the rails

Coinbase's L2. Institutional-grade infrastructure. 100M verified Coinbase users upstream.

03 iOS onramp is the unlock

Apple Pay → USDC, right inside iMessage. The moment anyone can fund in seconds, the TAM becomes every iPhone — no CEX account, no app to download, no seed phrase.

Built with the best Base *Partners*.

Plugged into the protocols powering onchain finance — every action settles on proven rails.

PARTNER

Avantis

Onchain trading infrastructure.

PARTNER

Bankr

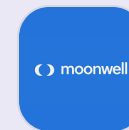

Onchain banking & payments.

PARTNER

XMTP

Secure, decentralized messaging.

INTEGRATION

Moonwell

USDC lending & yield.

Built by people who live in the *chat*.

Co-founder & CEO
Matthew Meakin

Dropped out of high school to join HBO's *Deadwood* Art Department. Previously worked as a Celebrity Interventionist specializing in High Acuity cases and Fentanyl Addiction.

Later, discovered a passion for building tech: scouted by Coinbase's Claudia Haddad from the floor at Onchain Summit SF, then built Coinbase's Event Agent, deployed at Basecamp 2025 and DevConnect Argentina. Base Batches 002.

Co-founder & CTO
Risav

CS&E graduate who was deep in Base before most knew it existed. Led engineering for Late Night on Base and Base Junkie — two of the ecosystem's most-followed builders. A full-stack engineer whose work spans frontend development, backend systems, cloud infrastructure, and blockchain integrations — building AI-powered tools, consumer applications, and developer-focused products.
